

MEETING OF THE
Expert Team on GAW WORLD DATA CENTRES
(Eawag, Dübendorf, 15 March 2007)

Terms of Reference for the Expert Team on GAW World Data Centres [WMO, 2006]

- (a) To coordinate the activities of GAW WDCs and the GAW Station Information System (GAWSIS);
- (b) To formulate GAW requirements for the WMO Information System (WIS) and contribute to defining and coordinating services for operational, time-critical applications so that GAW and other environmental observational data are available to users online and, when possible, in near real time.
