**Subject:** Re: ET-GAW WDC Meeting next Thursday

Dear Joerg,

Unfortunately, I have a commitment next thursday and have planned to leave Duebendorf right after the IGACO meeting. Thus, I won't be able to participate to the ET-WDC meeting.

Also, it is perhaps a bit early in so far I have now to propose participants for the expert team and have a first meeting (if possible by the summer or soon after) to review our terms of reference and set-up an action plan. Certainly later (next meeting or so), I or a colleague for the ET-NRT-CDT would like to participate to a ET-WDC meeting and discuss the topic. Anyway, I would be interested by the minutes of the discussion on this topic next thursday, in order to have a quick review on the views of WDC leaders regarding NRT data. Within the GEMS european project, we have started working on technical aspects (extended BUFR,...) and on many underlying principles (unvalidated/validated data, NRT flux versus data archives, rights to access data,...). We are currently setting up a proposal for FP7 (follow-up of GEMS) into which we think of having the WIS for all data transfers between the partners (AQ or environment agencies across Europe, modelling groups / universities, national meteorological services, ECMWF,...). The experience of AirNow in North America is also something we have in scope. Last, the build-up of the ET-NRT-CDT should also allow to represent communities for in-situ (surface/AQ/remote sites and profile/aircraft) and satellite data, as well as a coverage of the different continents.

Looking forward to seeing you next week,

Vincent-Henri

> this may be a bit late, but I only just now realized that V.-H. will be attending the IGACO-03 meeting. The GAW World Data Center Managers will meet Thursday all day as they regularly do. I am working on the agenda at this moment (cf. attached) and was wondering if you would have an interest in attending our meeting. If so, I would like to invite you to convene agenda item 6.
